

# Pin down your safety concerns

The new **Shesha Shackle** Snatch Block from WRE cuts cost per ton mined substantially:

- Longer lifespan means fewer snatch blocks used
- Longer scraper rope life
- Fewer stoppages, thus higher productivity
- Reduce lost blasts on panels
- Chamfered shackle for increased chain and eye-bolt life
- Reduced repair cost, fewer peeled-open cheeks

In addition, the new design engineers a safer working environment:

- Safer and easier to install
- No pins – can't forget to attach and can't lose pins
- Meets SANS 1819 specifications

Decades of Dedicated Service Delivery

WRE has been supplying the mining industry with critical components since 1928 and manufactures in accordance with ISO 9001-2000 regulations. This success stems from our success in offering strong service support, high availability, short delivery cycles, high quality products, reliability and an on-going R&D drive.
